Questions for Seminar II

The following questions need to be answered when you read through the article. Your discussion group will be required to turn in complete answers in class.

1. What is the point of this paper? Why do you think ESRI published it?

2. Define the following terms:
   i. ArcObjects
   ii. COM
   iii. Interface
   iv. Extensibility
   v. Component
   vi. Data Model

3. ArcObjects are built on COM architecture. What are the advantages of using the COM?

4. What are some of the limitations of ArcObjects?

5. This paper talks about three levels at which you can customize ArcInfo using ArcObjects. Which level is most similar to ArcView’s Avenue?

6. What programming languages can be used with ArcObjects?

7. In what ways can you extend the ArcInfo data model using ArcObjects?
